

# Information about your eye test

## ENGLISCH

Welcome

In this little piece of information you will find important information for your eye test. Today we test your daily visual acuity. Your visual acuity is not always the same. We do not test eye strength, but only whether you have more than 70% vision (Visus 0.7) today. Visus 0.7 on each eye is the value you have to achieve in order to be able to submit a driving license application. You will see rings in the eye examiner that have an opening. You just have to say the direction of the openings from right to left.

For the eye test, you have to place your forehead on the headrest. You will then see five rows. The first row has four large rings. Row two and three have ten rings. Row four and five are not relevant for the eye test. For the driver's license vision test, you only have to read the first three rows aloud. Important: In rows two and three, each eye is tested separately - never both together. You have one second to recognize each ring and to announce the opening. The eye test may only be repeated with improved glasses / contact lenses.

We are obliged to carry out the eye test seriously, professionally and in the interest of everyone for more safety in road traffic. We have no influence on the eye test result. The average failure rate is around 15%. Please understand that the fee for the eye test is charged with no results. If you fail, you have to go to the ophthalmologist and have your eyesight checked there.

Tip: Don't stress yourself - the only thing that can happen to you is that you need glasses to drive a car.

## The eye test

"You have to get your head right up to the device."

"Now look into the device - you will see rings there. Please tell me where the OPENINGS of the rings point. "

“There are rings whose OPENING points UP, DOWN, RIGHT or LEFT and there are rings that point UP RIGHT, UP LEFT, DOWN RIGHT or DOWN LEFT.

## BOTH EYES

“We start with row 1! Always look through the device with both eyes. Please always read the rows from LEFT to RIGHT. In row 1, both eyes are tested.

Please read row 1 to me now ”

## RIGHT EYE

“Now we are testing your RIGHT EYE. Your left is darkened ”

“Now please read out rows 2 and 3 slowly”

## LEFT EYE

“Now we are testing your LEFT eye - your right one is now darkened.”

“Now please read out rows 2 and 3”

“That's it - the eye test is over”
